THE BEST ROUTES TO QUALITY NURSERY-STOCK

ABOUT OUR NURSERY.....

Our first wholesale price list was sent out to the trade thirty years ago this fall. It was a one page list and contained a limited assortment of evergreens and shrubs. Our price list this fall presents a wide range of evergreens, both B&B and lining-out stock, as well as shade trees, flowering shrubs, potted roses and many additional items. All plantings have been greatly expanded and it is our aim to be in a position to supply material in large quantities with good quality and at reasonable prices.

Good quality potted roses have become a specialty with us. We believe, and many of our customers concur, that we put out some of the finest roses to be had.

Growing quality nursery stock depends to a large extent on good soil cultural practices. Much time and effort is spent in putting our land in good sod and green manure crops. The quality of our stock today has affirmed our efforts in good soil management.

Finally, and most important of all, we are grateful to the many customers whose valued patronage through the years has played such an important part in our business. To our old customers, and to our future new ones, we assure you that your orders are much appreciated and that we will at all times do our best to provide good quality and good service.
